Number of prevalence surveys by publication year

Number of prevalence surveys by study start year

Number of prevalence surveys by study end year

Number of prevalence surveys by screening algorithm

screening tests

Chest X-ray and symptom screen; Other: Chest X-ray, and symptom screen, and assessment for history of previous TB treatment

1

Other: Symptom screen or screening culture

1

Symptom screen, then chest X-ray (if positive)

5

Chest X-ray only

1

No screening performed

8

Chest X-ray and symptom screen; Other: some site have the MMR, some site have the radiography

1

Symptom screen only

43

Chest X-ray and symptom screen

5

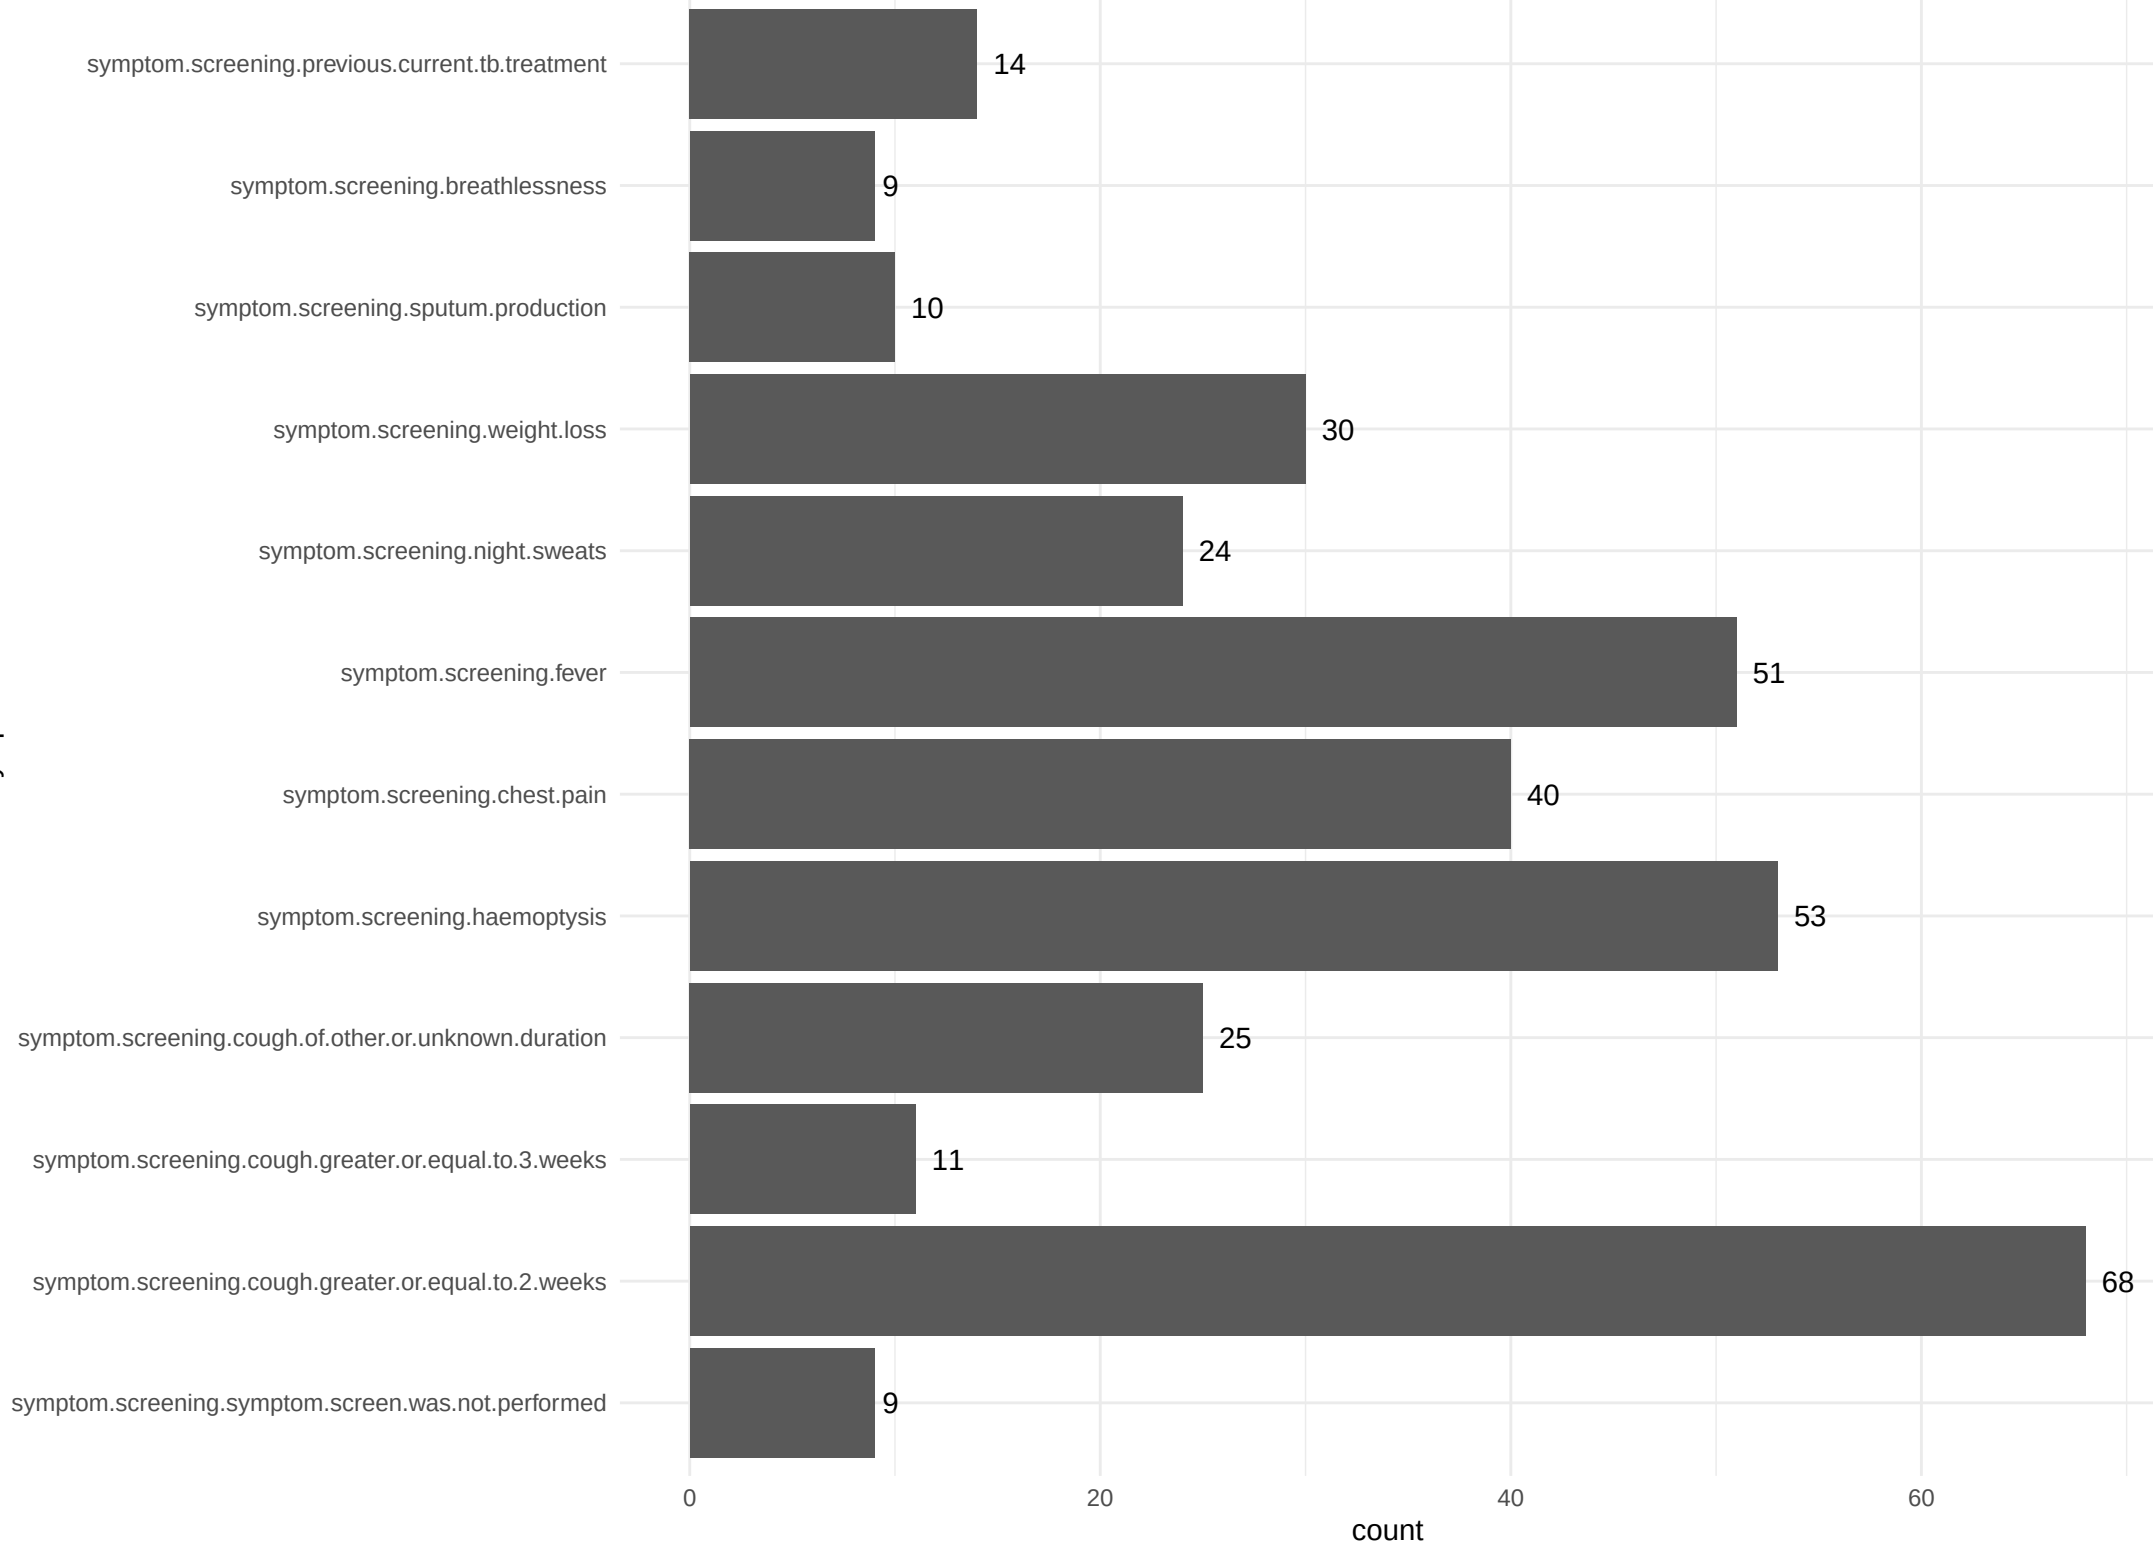

Chest X-ray and symptom screen; Other: only 36.8% of the registered individuals could be screened by MMR due to its breakdown mid-way through the survey.
